

Position:	Salary:	Location:
Associate Programmer Analyst (Specialist)	\$4,316-\$5,247 per month	818 K Street Room 300 Sacramento 95814

ABOUT THE JOB: The Associate Programmer Analyst (APA) will serve as the Web Developer. In this role, the APA acts as the technical specialist for the design, development and maintenance of OSHPD's Internet web-based applications.

DUTIES: Responsible for planning, designing, building, testing, implementing, and maintaining distributed multi-tier web based applications using Object Oriented Analysis and Design, Microsoft .NET framework, VB .NET, ASP.NET, ADO.NET, COM+, XML/XSLT, and Web Services. This involves the technical aspects of designing, coding, testing and installing mission-critical Internet web-based applications, working closely and effectively with clients throughout the applications development life cycle, employing Object Oriented analysis and design and rapid application development methodologies to implement successful applications within budgeted costs and schedules, undertaking approved research and development projects to evaluate and test new and emerging IT products and tools, and collaborating work activities of a virtual team comprise of in-house technical specialists, Health and Human Services Data Center (HHSDC) technical staff, and external Information Technology (IT) consultants.

SELECTION CRITERIA: The APA must have in-depth IT knowledge with respect to information systems concepts, practices, methods, principles; distributed Internet web-based web applications; system architectures and configurations, load balancing and clustering; networking; and demonstrate the ability to apply that knowledge to collaborate and/or coordinate work on the complex technical problems and issues.

QUALIFICATIONS:

- Knowledge of Microsoft Visual Basic .NET & ASP.NET
- Web and Systems administration skills
- Knowledge of Object Oriented analysis and programming
- Knowledge of XML, XSL and Web Services
- Security, SSL encryption knowledge

DESIRABLE QUALIFICATIONS:

- MS Visual Studio .NET Framework
- SQL 2003 database programming (TSQL)
- MS Windows 2003 Advance Server
- IIS administration and tuning

WHO MAY APPLY: SROA and Surplus are encouraged to apply. Applications will be screened and only the most qualified applicants will be interviewed. Hiring of a non-SROA applicant is subject to SROA/Surplus policies and approval of a freeze exemption.

FINAL FILING DATE: 12/09/03 or until filled

Send a State application (STD 678) and resume to:
